

East Lyme Board of Education Goals for 2019-2020

Preamble: Over the past two years the BOE and the Administration have implemented within budget, scope and schedule the Elementary Facilities Alterations Project. In addition, a redistricting plan for the three elementary schools has been devised and implemented to balance enrollment across the district. The Board strongly commends the enormous efforts of the Superintendent and his leadership team for assuring the successful implementation of these complex projects. In the coming year, it is important to allow our Elementary staff and students to adjust and engage in their new environments as well as to support the full engagement of our Superintendent and Assistant Superintendent with the staff and students across the entire district. This priority is critical to the advancement of the Long-Range Coherence Plan.

In conjunction with the Superintendent, Administration and Staff the BOE will support the following outlined goals:

- Support and monitor implementation of the Long-Range Coherence plan in its third year with regular updates at Board of Education meetings
 - Monitor (data review) and support district systems and school improvement plans for driving student success and growth.
 - Support the focus on technology (infrastructure and classroom usage)
 - Monitor, assess and support student social and emotional development
- Complete the Elementary Facilities Alteration Projects and monitor implemented redistricting plan for the Elementary Schools
- Improve BOE communication and outreach within the district, parents and the East Lyme community
- Support and implement a 10-year facility maintenance plan.
- Continue to build with transparent processes for constructing the annual operational budget
